HOUSE AND SENATE APPORTIONMENT COMMISSIONS

Tuesday, April 5th, 2011
2:00 pm – 4:30 pm
Governor's Office Building – Room 470

AGENDA

- I. Presentation on ethics, Sunshine law, and legal issues (A.G.'s office)
- II. Distribution of Missouri Apportionment Commission Handbook and brief overview (Kristina Jenkins)
- III. Maptitude for Redistricting software demonstration (Kirk Webb and Frank Hutto)
 - Basic principles of the software
 - Quick listing of the data elements provided
 - Demonstration of how the software builds legislative districts while compiling aggregate data fields
- IV. Presentation on data limitations (Matt Hesser)
 - Voting precinct boundaries – their integration into the system and uses in the redistricting process
 - Election returns – process by which data are gathered and displayed within the redistricting software
 - Data complexities
 - The merging of voting precinct boundaries and election returns data became complex within certain voting precincts
 - Newer election returns data matched the voting precinct boundaries better than older election returns data

- Splitting voting precincts clouds election returns information compiled for newly created legislative districts

V. Adjourn
